I am a highly motivated and ambitious **Full Stack Web Developer** with a passion for technology and innovation. Currently, I am seeking a challenging opportunity to put my skills and knowledge to use and contribute to a dynamic team.

PROFESSIONAL EXPERIENCE

Key RE Solutions   December 2023 - Present
Front End Web Developer

- Led the design and development of the company's website, creating a modern and user-friendly interface with HTML, CSS, and JavaScript.
- Continuously enhancing the website's design and functionality to keep it up-to-date and competitive in the market.
- Maintaining and updating SEO strategies to improve search engine visibility and attract more organic traffic.
- Providing ongoing support and troubleshooting for website issues as they arise.

Freelance   January 2021 - Present
Full Stack Web Developer

- Developing full-stack web applications using React.js for the frontend and Python for the backend, ensuring seamless integration and optimal performance.
- Implementing RESTful APIs to facilitate communication between the frontend and backend, enabling data exchange and interaction with external systems.
- Collaborating closely with clients to gather project requirements, define objectives, and ensure alignment with their business goals.
- Maintaining and updating existing web applications, implementing new features, fixing bugs, and addressing performance issues as needed.
